

Agricultural Professionals

Overview

The Agricultural Professionals program is one of Dalby State High School's signature programs. It is a prescribed course of study designed for those students interested in a career in agriculture (or related fields) that requires a university qualification.

The combination of five Authority subjects, a vocational certificate and a university subject provides students with not only an OP for university entrance but valuable practical skills.

Although there is some choice in the program of study there are preferred subjects that students should study to prepare themselves for a tertiary agriculture course.

Students will also complete a Certificate II in Agriculture to provide more practical skills.

Students who are performing well will have the option to study a university subject offered by the University of Queensland Gatton Campus in semester 1 of year 12. Successful students will have guaranteed entry in an agricultural course when they leave school.

Courses studied

English	Students will study English in standard classes with other students from the school.
Maths	Students will study a mathematics subject in standard classes with other students from the school. Ag Professionals must study either Maths B (preferred) or Maths A.
Agricultural Science	Students will study Agricultural Sciences with other students who have chosen this subject. This is an academic subject.
Two other Authority subjects	Students have a choice of two other Authority subjects. It is preferred that students choose two of: Biology, Chemistry or Accounting.
Certificate II in Agriculture	Students will study a certificate II in agriculture with other students in the school in two half day blocks during the week.
Enhanced Study Program	The Enhanced Studies Program is offered by UQ Gatton Campus (Animal Welfare, Behaviour & Handling, ANIM1014). It is a university subject offered to high school students
